## DEEP CLEAN WITH HIMALAYAN SALT

The preparation of the skin, in order to receive skin nutrients, is of prime importance. Additionally, it helps to replenish moisture in the Epidermis by encouraging new skin cells to come forward and slough off the dead ones. This process of "exfoliation" becomes more important past the age of 35, supporting skin cell renewal, when this natural process slows down and continues to become slower as we age.

One product in the UniQ10ue Cell Cosmetic's line: **DEEP CLEAN** is an **Anti-oxidative Cleanser** that contains not only the powerful **CoQ10** but also other nutrients rich in sterols, tocopherols, fatty acids- Omega 3,6, & 9, anti-inflammatories and anti-oxidants from; Baobab Seed extract: Theobroma Cacao: and Vitamin E & C.

Combine the **DEEP CLEAN** with **Q10's PEELING MIX**–Himalayan Salt, and you'll have the perfect blend of exfoliating solution that successfully, and gently, removes unwanted cells and soil, enabling the skin cells to breath, be thoroughly clean, smooth and firm.

*Perfect for Spa and Home-care use.  
Available in CABIN and Home Care sizes*
