DEEP PEELING FOR FEET

IN A SINGLE TREATMENT
YOUR FEET NATURALLY SOFT...

CORPORA
THE FAST BEAUTY CONCEPT

novasilk exfoliation is an exfoliant treatment for feet. Its formula produces peeling, removing the outer layer of dead skin cells. Its fruit acids, glycolic acid and lactic acid cause gentle yet natural exfoliation. You can thereby recover flexibility and softness in aging, dry, rough, or mistreated feet. It helps to regenerate skin tissue on cracked, unsightly and painful heels.

Its handy presentation as a “foot-mask” enables deep penetration of its active ingredients. Its 20 natural extracts renew the epidermis while improving its texture.

Presentation in “foot-mask” format

With a single treatment you'll achieve smooth feet with no roughness

Application protocol

1. Wash and dry both feet.
2. Next, apply the Novasilk exfoliation treatment.
3. Allow to act for 60 minutes.
4. Remove Novasilk exfoliation. Wash feet in water using a pH-neutral soap and dry with a towel.
5. The skin's dead cells will continue to be eliminated naturally over the 4 to 7 days following application.
