CELL COSMETIC CONCENTRATES

MULTI-LEVEL SKIN CARE

## CoENZYME Q10: FREQUENTLY ASKED QUESTION

**Q:** *Why do I need to use a skin care product that contains CoQ10?*

**A:** CoQ10 is the best Anti-aging agent nature has to offer. It stimulates the skin's metabolism, protects and counteracts oxidative stress (\* Free Radicals) in the skin's cells.

**Q:** *Can't my skin protect it's self by using any type of moisturizing cream?*

**A:** When skin is young it has a better chance of protecting it's self. However, after the age of 30 the mechanisms of the cell's energy, required for renewal, repair and protection, slows down, as does the ability to convert fat soluble CoQ10 (Ubiquinone) into the utilizable water -soluble form (Ubiquinol), a vital force for the renewal of proteins. This energy is known as ATP's. CoQ10 restores this energy. Without a sufficient supply of CoQ10 cells die.

**Q:** *How is this possible when the product is applied topically?*

**A:** Each of the **UniQ10ue Cosmetic Concentrations** have a different benefit and action on each layer of the Dermis. Advanced technology allows them to pass through the lipid barrier, to penetrate to the different layers of the Skin where they can interact with the specific cells and work from the inside out.

**Q:** *Can't I get the same results by using other creams that contain COQ10?*

**A:** CoQ10 is an expensive ingredient, so cheaper products are less likely to contain large amounts to supply a significant quantity of the nutrient to have any remarkable effect: **UniQ10ue** Cosmetics are the only products in the world that are comprised of the active agent accelerator: **Cell Active Q10**. It is 100% natural + 100 Bio available + highest concentration. 50 times more per dosage than in any other Q10 creams.

**Q:** *Won't my skin get enough protection by wearing a moisturizer with an SPF?*

**A:** Partially, sunscreens don't give 100% protection and are not able to repair any damage, or replace nutrients that are destroyed, as a result of UVA/UVB exposure. Research shows that, COQ10 is the first nutrient to be destroyed by the Sun's rays before other essential nutrients such as; Vitamin C. CoQ10 is essential for protecting the integrity and life of Vitamin C, and is also an anti-inflammatory and aids in the cell's repair. The product contain no, parabens - mineral oils – colourants, or animal testing.

**Q:** *What other benefits will I get from using CoQ10 cosmetics?*

**A:** **Uniq10ue Cell Cosmetic** is an innovative Cosmetic System that can be used exclusively, or combined with any of your favorite creams. UniQ10ue incorporates other nutritional elements that collaborate with Q10 in the rehabilitation of skin cells, right down to the connective tissue (Collagen). HA (hyaluronic Acid), which is responsible for the hydration and restructuring of Collagen is in most all of the products in varying percentages. Other extracts i.e.; **PhytoCell™** is known to bio-mimic human stem cells; protect the Basal degeneration and accelerate regeneration. **AdipoFill™**; reduces wrinkles depth up to 37%. **SYNTacks™**; is responsible for improving the skin's elasticity by 32%

**Q:** *Will these products stop my skin from pre-mature aging?*

**A:** 75% of extrinsic Skin aging can be successfully tackled with UniQ10ue. 25% of intrinsic aging is unstoppable due to natural genetic disposition, DNA. However, regular applications of **Cell Active Q10** will reverse some of the effects and prevent others, at any age. Oral supplementation of the **Q10 Skin Forte Granulate** reduces wrinkle depth and width up to 36%, by treating the Skin from the inside out where no cream can reach. Let's not forget that the skin is an organ of repair and given the correct nutritional environment will continue to do so, remain, or become youthful, stay resilient and healthy.
