

Biosbee.

The House of Dr. Nobis

Bios**bee**- the golden bee range is a natural skin care scientifically developed with a biologically active formula. It designed for dry, or atrophic skin and for the more mature skin to maintain a natural, healthy radiance.

These products combine all of nature's powers and contain all active ingredients which the bee can produce from them.

Biologically-sealed flower pollens **without allergens**. Royal jelly, beeswax and honey.

Bios**bee**'s discreet perfume is based on natural essential oils and further enhances this unique select skin-care range. bios**bee** **has been created with the highest requirements in natural cosmetics**

THE *Third* GENERATION

In 1954 Apiserum G Leinberger was founded in Lindau, near Bodensee, by Erika Goudouneix. Later their own brand name, Revita was developed and registered in 1966. The company then moved to Oberbayen, Laufen, Salzach, where it remains today.

Dr. Arnold Nobis Dipl. Ing., the nephew of Erika Goudouneix, took over the company's production in 1972. He became the official owner of Apiserum-Revita Dr. Nobis GmbH in 1988.

Berthold Nobis joined the company in 2004 after completing his Biochemical studies in Graz. Dr. A Nobis retired in 2012 and handed the operation and management of the company to his son, (Dr.) Berthold Nobis, the third generation to embrace the company, which exports over 50% of its products, to the Far East, Canada, the U.S.A. and also many European distribution locations.

Biosbee the golden bee range

Few natural substances are more complete in natural elements than those found in the Biosbee range of products. **Royal Jelly, Flower Pollen, Honey & Clove Bud Oil.**

These elements are: Vitamins A, E, C, P, B Complex, beta Carotene, magnesium, selenium, silica, zinc and copper, (antioxidants). Bio-flavonoids: hesperidin (rutin), caffeic acid, ferulic acid. & eugenol.

Royal Jelly: is secreted by the glands near the mouth of the bee. It contains 22 amino acids (a complete protein), Vitamins A, C, E, K, & B Complex: B1.B2.B3.B5.B6.B12. pantothenic acid, inositol, folic acid, nicotinic acid, and biotin. Trace minerals: magnesium, calcium zinc, potassium, iron, copper and cobalt.

Bee Flower Pollen: is gathered from flowering plants and trees and is very complex. In addition to Vitamins A, D, E, B1(thiamin) Choline, Vitamin C (ascorbic acid) Vitamin K & rutin (hesperidin). It also contains the trace minerals: sodium, potassium, magnesium, calcium aluminum, iron, copper, zinc, lead, silica, phosphorus, chlorine and Sulphur, plus 14, or more enzymes.

Clove Bud Oil: derived from the clove tree, a member of the Myrtaceae family. This essential oil is known for its antimicrobial, antifungal, antiseptic, antiviral and stimulant properties. When applied topically, clove bud oil can help address skin problems like warts, acne, sagging skin and wrinkles. The flavonoids in Clove Oil have anti-inflammatory agents, these properties will help ease inflammation and also have a cooling effect. It helps revive the youthfulness of the Skin.
