

Introducing the
Genetic Test
That's Turning Heads

GET TO THE ROOT
CAUSE LET **YOUR DNA**
BE THE GUIDE IN
SHOWING WHAT WORKS
FOR YOU

SkinDNA™ 

The **GENETIC** Test That's Turning Heads

SkinDNA is revolutionary DNA test that examines 16 genetic markers (SNP's) in five categories associated to skin aging & protection. The DNA code that you were born with determines how prematurely your Skin will show these HIGH RISK signs of aging, which starts from within. The test tells you what actions you can take to prevent, or reverse them.

- **FIRMNESS & ELASTICITY** (Collagen breakdown)
- **GLYCATION** (Major cause of wrinkling)
- **SUN DAMAGE & PIGMENTATION** (High risk of burning)
- **FREE RADICAL DAMAGE** (Increased sensitivity to pollutants)
- **SENSITIVITY + INFLAMMATION** (Risk of Chemical sensitivity)
